

SHAYLEE-ANN BILLABER-FERRER

EDUCATION

Chaminade University of Honolulu

Double Major in Computer Science and Data Science

2025-Present

SKILLS

Coding - Python, R, Java, SQL

Data Analysis

Problem-Solving

Analytical Thinking

WORK EXPERIENCE

Busser/Host at The Crouching Lion Restaurant

December 2025 - September 2026

Welcomed guests, managed reservations and seating, and accommodated guest requests. Used OpenTable and coordinated with servers to ensure smooth operations. Trained new hires on job responsibilities and restaurant procedures.

Opperations Assistant at The Queens Waikiki Luau

September 2026 - Present

Set up and broke down tables, chairs, and event equipment for luau events. Assisted with event preparation and cleanup to ensure smooth operations. Collaborated with team members to create a welcoming guest experience.

PROFILE

Computer and Data Science student committed to continuous learning, personal growth, and professional development. Experienced in remote technical work and in-person customer service environments. Interested in opportunities to build upon existing knowledge and contribute to meaningful projects within the technology field.

INTERNSHIP EXPERIENCE

SCIPE CYBERINFRASTRUCTURE SUMMER IMMERSION PROGRAM

May 27 - June 26 (2026)

- *Hosted by the University of Hawaii Data Science Institute*
- *Conducted an individual research project examining sea level rise and extreme water events at Mokuoloe, Oʻahu.*
- *Retrieved and cleaned environmental datasets from Earth.gov*
- *Developed a dashboard using Python and Streamlit to visualize data and communicate research findings.*
- *Presented research findings and data visualizations to an audience through a virtual Zoom presentation.*

GitHub: *https://github.com/shayleeannf/SCIPE-CI-SIP_Mokuoloe_Dashboard.git*

ADVANCED COMPUTING STUDENT COLLABORATIVE PROGRAM

Upcoming November 14-20

- *Presented by the U.S. National Science Foundation (NSF) Leadership-Class Computing Facility (LCCF)*
- *Participating in virtual training activities in preparation for a week-long, in-person computational and data analytics program.*
- *Preparing to explore applications of artificial intelligence, data science, and high-performance computing.*
- *Anticipated focus on data visualization, collaborative problem-solving, and communicating technical concepts.*
